EURASIP RFID 2019

The 7th international EURASIP workshop on RFID technology

CALL FOR PAPERS

RFID has evolved into an active multidisciplinary area of research and development, composed by a broad spectrum of fields. The 7th international EURASIP workshop on RFID technology will provide a premium forum for presentation of the most recent research in this technology. Aside from the regular presentations, the conference will include keynote addresses with speakers from both industry and academia. This call for papers intends to solicit contributions in all areas pertinent to RFID.

TOPICS include, but are not limited to:

- **Modeling, Simulation and Performance in RFID**
- **Electromagnetic field measurements**
- **Ambient intelligence based on RFID labeling**
- **Standards and communication protocols**
- **Antenna Design**
- **Modulation schemes for RFID**
- **Implementation issues**
- **Inductive coupling for DC supply**
- **Multi-frequency and broadband tags**
- **Near field communications**
- **Smart and programmable tags**
- **Sensor networks with RFID**
- **Manufacturing processes for RFID tags**
- **Applications and industrial experience**
- **Security issues and protocols**

SUBMISSION GUIDELINES

Authors are encouraged to submit original, unpublished work for presentation at the workshop in the form of posters and/or full papers. Acceptance shall be based on full papers. The conference proceedings will be submitted to the IEEE Xplore[®] digital library.
